Re John Romanous & Associates
Consulting Civil & Structural Engineers

We have been utilizing the services of the abovenamed organisation since 1998.

During this period they have attended to all our structural and hydraulic engineering scope of works including site inspections and final certification.

We specialize in the construction of large medium density residential projects with basement parking.

John and his associates have completed over this period for us additional to the above overland flood reports arranged geotech reports building reports certification of works required council certification of works etc.

Their quick access to other professionals and consultants to complete required works is also a major advantage.

John Romanous operates a very professional organisation that is supported by a equally professional support staff who are always readily available to answer all your queries and liaise with associated consultants to get the job completed.

We look forward to our continuing long and professional association with John Romanous & Associates into the future.

Should you require any further information do not hesitate to contact the undersigned.

Yours faithfully

Ernie I Kasif
Managing Director
